PROFESSIONAL SUMMARY

Entry-level DevOps / DevSecOps Engineer with basic knowledge and hands-on project experience in Linux, Linux, networking, Git, Bash, Python, C/CD, Docker, Kubernetes, Terraform, Anisble, and AWS. Familiar with AWS services including EC2, S3, IAM, VPC, RDS, EKS,Lambda, and CloudFormation. Built practical projects involving CI/CD automation, containerized applications, and Infrastructure as Code. Seeking an entry-level opportunity to contribute to cloud infrastructure, automation, deployment, and security-focused DevOps practices.

CORE SKILLS

- **Linux & Unix** (Basic): Linux/UNIX administration, Ubuntu, SSH, file permissions, processes, service, package management
- **Networking** (Basic): TopIP, DNS, HTTP/HTTPS, SSH,
- **Git & Version** Control (Basic): Git, GitHub, GitHub
- **Shell Scripting** (Basic): Basic Bash / Shell scripting
- **Programming:** Basic Python, PHP
- **CI/CD** (Basic): CI/CD concepts, Jenkins, GitHub Actions, GitLab CI/CD
- **Containers & Kubernetes** (Basic): Docker, DockerCompose, Kubernetes
- **Infrastructure as Code** (Basic):Terraform, AWS CloudFormation
- **Configuration Management** (Basic): Anisble
- **Security** (Basic): IAM and access management, secrets management, DevSecOps fundamentals

AWS

Basic knowledge of EC2, S3, IAM, VPC, RDS, ECS, EKS, Lambda, CloudFormation (Basics), Secrets Management, Lambda, and AWS cloud infrastructure fundamentals.

TECHNICAL PROJECTS

1 DevSecOps CI/CD + Kubernetes

2026

Technologies: Linux, Git, GitHub, C/CD, Jenkins, Docker, Kubernetes

- Built a practical CI/CD workflow for automated application build and deployment.
- Used Git-based version control and CI/CD tooling to automate the software delivery process.
- Containerized the application using Docker.
- Deployed and managed application workloads using Kubernetes.
- Applied basic DevSecOps practices within the CI/CD workflow.

2 Terraform + Ansible + Automated Infrastructure

2026

Technologies: Terraform, Ansible, AWS, Linux, Git

- Provisioned infrastructure using Terraform following Infrastructure as Code principles.
- Used Ansible for basic configuration management and automated system setup.
- Practiced repeatable infrastructure deployment and configuration through automation.
- Managed infrastructure code using Git version control.

HANDS-ON DEVOPS EXPERIENCE**Independent DevOps & Cloud Projects**

2026

- Built hands-on projects covering Linux, Git, CI/CD, Docker, Kubernetes, Terraform, Ansible, and AWS fundamentals.
- Provisioned and configured infrastructure using Infrastructure as Code practices.
- Created containerized application environments and practiced Kubernetes-based deployment.
- Implemented CI/CD workflows for automated build and deployment.
- Practiced basic cloud security concepts including IAM, access management, and secrets management.

EDUCATION**Bachelor of Science in Information Technology (BSc IT)**

2025

Mumbai, Maharashtra 2022 – 2025

TRAINING & COURSES

- Terraform Fundamentals / Infrastructure as Code – Basic Course
- docker Fundamentals – Basic Course
- Git & GitHub Version Control – Basic Course
- DevSecOps & SRE Foundation – 2026

ACHIEVEMENTS

Competitive 5K runner; earned 4 trophies and 10+ medals through regular training and participation in competitive events.
